

FINANCIAL TOOL OVERVIEW

COMPOUND INTEREST CALCULATOR

Calculate your financial future with precision.

Browser-based

No account needed

Runs entirely client-side

WHAT IS IT

A Free, Browser-Based Calculator

A compound interest calculator built entirely in the browser — no server, no account, no tracking.

Enter your investment parameters, hit calculate, and instantly see a

\$0

to use, forever

Completely client-side. Your data never leaves your browser.

KEY FEATURES

Built for Clarity

5 Inputs

Annual return,
initial deposit,
monthly
investment,
starting age,
retirement age

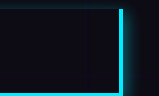

Real-Time

Instant client-side
calculation with
inline validation on
every input

Chart + Table

Interactive Chart.js
line chart and a full
year-by-year data
breakdown

Responsive design — works on desktop, tablet, and mobile.

Six Steps to Your Projection

01 Enter your expected annual return (%)

02 Set your initial deposit (\$)

03 Add a monthly investment amount (\$)

04 Set your starting age and retirement age

05 Click "CALCULATE COMPOUND INTEREST"

06 View your projected final balance, total contributions, interest earned, and growth chart

Built-In Guardrails

Annual Return

Must be between -20% and +20%

Monetary Values

Initial deposit and monthly investment must be positive

Age Range

ERROR DISPLAY

Validation errors appear inline beneath each field — no page reload, no confusion about which input to fix.

THE CHART

Growth, Visualised

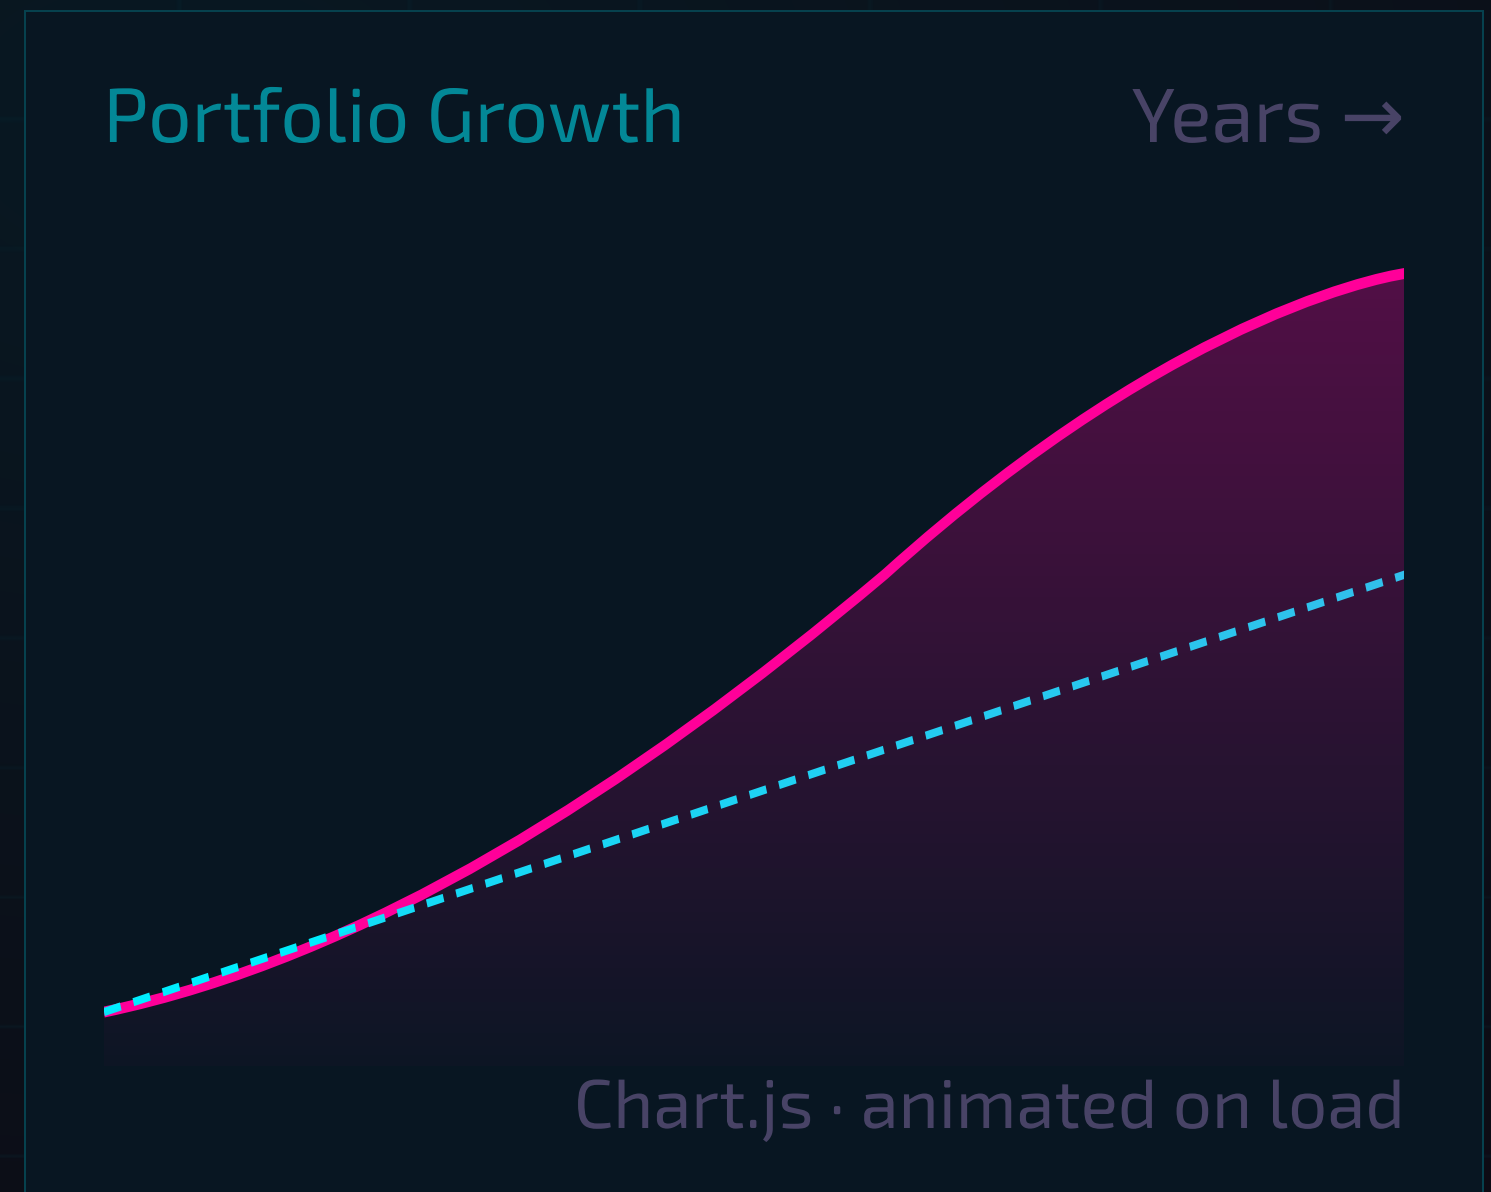

Portfolio Balance

Your total projected portfolio value at each year

Total Contributions

The sum of what you actually put in, year by year
